

BASIC INSPECTION SCHEDULE	Daily	Start Up	First Maintenance (50 h or 6 Mnt)	Periodically (Running Hours)					At Least	
				100 h	200 h	500 h	1000 h	2000 h	Every Year	Every 2 Years
LUBRICATION SYSTEM										
Check Lub. Oil Level	X	X		X						
Change Lub. Oil			X	X					X	
Change Oil Filter			X	X					X	
Check for Oil Leakage	X	X							X	
INTAKE & EXHAUST SYSTEM										
Check for Air Leakage (Hoses, Clamps, Pipes, etc.)		X		X					X	
Clean Air Filter				X						X
Change Air Filter					X					X
Clean Spark Plug				X					X	
Check Exhaust Pipe Lines		X		X					X	
Check State of Exhaust Gas		X		X					X	
FUEL SYSTEM										
Check Fuel Level	X									
Change Fuel Filter			X	X					X	
Replace fuel lines							X		X	
Check for Fuel Leakage	X	X								
Clean Carburator					X					
Clean Fuel Tank					X				X	
ELECTRICAL SYSTEM										
Clean spark plug				X					X	
Change spark plug						X				
Check Battery and Charge Level		X	X	X					X	
Clean Battery and Poles			X	X					X	
Check Battery Charger and Charge Alternator		X	X	X					X	
Check Cable Connections and ATS (If mounted)		X	X	X					X	
Check GenSet Control Unit and Functions		X	X	X					X	
OTHERS										
Check Coupling and Mounting Screws		X					X		X	
Adjust Intake&Exhaust Valve Clearance						X			X	
Check State of Vibration and Vibration Absorber		X					X		X	
Clean GenSet Surface and Surround	X		X	X					X	
<p>This Chart includes basic inspections and controls. Please look at the original books of Engine&Alternator Run the GenSet in test mode on load every week for 15 min.</p> <p>! Caution Please do the all maintenances on time for long and healthy operation life If necessary, do the checks more frequently, according to ambience, oil & fuel quality and running regularity</p>
